BULLETIN T-65-20

SUBJECT: TR-4A RADIOS

DATE: APRIL 15, 1965

This bulletin is a reminder to you of the caution which should be taken when fitting radios to the TR-4A.

In paragraph 7 of our service bulletin T-65-15, reference was made to the negative ground systems as applied to the TR-4A automobiles. When installing radios in the TR-4A it is necessary that a radio of dual polarity only be used. These are available from the Gardena Parts Department and the San Francisco Parts Department.

The single polarity radio which is in stock is only to be used in the Spitfire, 1200 and TR-4. NOT IN THE TR-4A.
